

Zavier Kamath

[Email](#) [LinkedIn](#) [GitHub](#) [Portfolio](#)

Full-stack AI engineer building practical LLM products from ambiguous needs to production.

SKILLS

Languages: Python, JavaScript / TypeScript, SQL, HTML, CSS, Git, Bash, LaTeX
AI: RAG, Agentic AI, LLMs, AI Evals / Security, Vector Databases, Claude / OpenAI API
Infra: Docker, Terraform, Kubernetes, CI/CD Pipelines
Frontend: React, Tailwind, Vite, User-Friendly AI Interfaces
Backend: FastAPI, LangChain, CrewAI, Strands, REST APIs, SQLite, Stripe, Plaid, boto3
Cloud: AWS (ECR, OpenSearch, Lambda, Bedrock), GCP (Cloud Run), Snowflake, Supabase
Tools: Claude Code, GitHub, Azure DevOps, Cursor, Copilot, Codex, OpenCode

EXPERIENCE

AI Engineer / Full-Stack Developer

May 2025 - Present

Huntington National Bank

Columbus, OH

- Saved **1.5M+** per year by leading full development of a reusable enterprise RAG agent framework supporting 5 internal AI projects, powering tools used by tens of thousands of colleagues.
- Mentored **200+** engineers through AI coding-agent workflow presentations and educated **100+** executives on AI efficiency through hands-on workshops.
- Led customer-facing (**10M+**) cross-cloud (AWS + GCP) AI solution for personalized financial insights and agentic financial assistant chatbots that connect to customer data.
- Owned full-stack delivery for internal AI tools, building React frontends, Python API services, and reusable patterns that let business teams move from request to working software faster.
- Deployed scalable AI applications across nonprod, QA, and production using Docker, Terraform, Kubernetes, AWS ECR, Azure DevOps, and GitHub pipelines.
- Emphasized **clear communication** with business teams, executives, and architects to turn ambiguous AI ideas into scalable architecture, clear requirements, and secure deployments.

Independent Full-Stack AI Builder

Jul 2024 - June 2026

Personal AI Products

Remote

- Built Memvia, a full-stack AI job-application assistant with a FastAPI and Pydantic AI backend, Claude API LLMs and embeddings, SQLite database, and React TypeScript frontend. Video demo: https://youtu.be/v_iPcjeXWnI.
- Built AI voice and mobile assistant demos with Twilio, Deepgram, AssemblyAI, ElevenLabs, Expo, and Plaid, including a phone-based ordering agent and a tool-using personal assistant. Video demo: <https://youtu.be/JUUb2m7nuY>.
- Iterated quickly from personal pain points to usable products, recording portfolio demos and testing products directly with real workflows such as workouts, spending, and job search.

Astrophysics Research Assistant

Summer 2023 - Summer 2024

The Ohio State University

Columbus, OH

- Used Python for Bayesian statistical analysis of Milky Way satellite galaxy data, comparing model predictions with observations to constrain Warm Dark Matter particle mass to greater than 4 keV and optimizing code performance by 100x.
- Presented research at OSU's Physics Summer Research Program poster session and wrote a methods summary for an upcoming publication.

EDUCATION

Georgia Institute of Technology

Jan 2026 - Summer 2027 (Expected)

M.S. Computer Science, AI Track

Online

- 4.0 GPA while working full time; courses include Artificial Intelligence and Quantum Computing.

The Ohio State University

Aug 2021 - May 2025

B.S. Physics and Astronomy & Astrophysics; Minor in Spanish

Columbus, OH

- Summa cum laude, 3.983 GPA, Dean's List all 8 semesters, Physics Senior Award.
